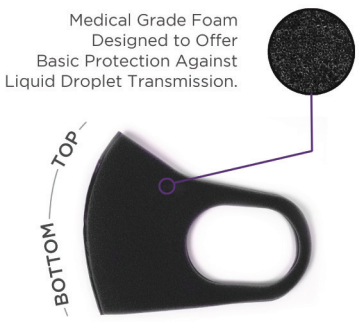
ConFORM™ 3D COVER

3D Cleanroom Foam Face Mask to Enhance Comfort over an Entire Shift. Class 100 / ISO 5 Fiber-Free Face Masks.



Now Available in Black or Purple.

When worn top side up, the form-fitting design maintains the mask in place, eliminating the need for constant manual adjustments.

Eyeglasses should be worn over the ConFORM™ 3D Cover to minimize fogging.

Description

ConFORM™ 3D masks for cleanrooms are constructed from a high density, ultrafine pore, pinhole-free foam to provide comfort, continuous particle/moisture control and enhanced protection from liquid droplets to the operator. The ConFORM™ 3D Cover is engineered to facilitate speaking and is comfortable to wear for extended durations. Unlike traditional 3-ply non-woven masks, the soft, stretchable polyurethane foam eliminates chaffing and pain behind the ears. The form-fitting design enables the cover to stay in place, minimizing cross-contamination to cleanroom gloves. The seam design offers minimal fogging of eyeglasses/safety glasses and additional comfort. ConFORM™ 3D masks are washed and packed in an ISO 5 cleanroom optimized to provide clean foam with ultra-low levels of particles and 100% lint and fiber-free performance.

Applications & Benefits

- Unsurpassed cleanliness for cleanroom applications where the operator is in close proximity to critical processes and components.
- 3D design for enhanced breathability and comfort for long-term use.
- Minimal fogging of eyeglasses/safety glasses and engineered to facilitate speaking.

Disclaimer

Non-FDA regulated general purpose personal protective equipment.

Personal protective equipment for general purpose and/or industrial use.

Not intended for use to prevent disease or illness.
