SurfCHECK®

Cleaning Validation Swab

## The Difference

- Certified to TOC Levels < 30ppb
- Pipettor like disconnect to eliminate cutting
- Excellent solvent compatibility for HPLC & IMS testing
- Designed to minimize risks of cross contamination

## Physical Properties

| Part | Material |
|---|---|
| Handle | Polypropylene |
| Tip | Knitted Polyester |
| Tip Shaft | Polypropylene |
| Tip Tray | PET |

The SurfCHECK® Cleaning Validation Swab is a unique, patent-pending tool specifically engineered to support pharmaceutical cleaning validation work using various analytical methods, including TOC, HPLC, IMS & UV-Vis. The SurfCHECK® will eliminate background interference from improper technician handling techniques by a design that allows technicians to use the tools the same way every time without ever touching the swab tip.

Each tip is firmly held in place in an easy-to-use tray, connecting to the handle at point-of-use. Tips are oriented for ease of use, ensuring that technicians will insert them properly and securely. After swab-bing, the tips can be placed into the diluent by depressing a protected button at the top of the pen. There is no need for cutting implements or snapping mechanisms which can contaminate the sample. Each tip and SurfCHECK® are certified at less than 30ppb TOC for that type of analytical work.

## The Next Generation Cleaning Validation Swab

1 Hands Free Attachable Disposable Heads

2 Extremely Flexible Tip

3 Detaches with a Click of a Button

4 Ready for validation, Prevents Cross Contamination

| PART NO. | DESCRIPTION |
|---|---|
| HT200A | Flexible Small Cylinder Polyester Tip Swabs, 2 FTSWAB-PENs, 6 inch Handle - 24 Swabs/Tray, 6 Trays/Kit |
| HT200B | Flexible Large Cylinder Polyester Tip Swabs, 2 FTSWAB-PENs, 6 inch Handle - 24 Swabs/Tray, 6 Trays/Kit |
| HT200AB | Variety Kit, 1 FTSWAB-PEN, 6 inch Handle - 6 Small Swabs/Tray, 2 Trays/Kit, 6 Large Swabs/Tray, 2 Trays/Kit |
